

I am concerned about the additional budget cuts to education in California. California already ranks close to last in per-pupil funding - additional cuts will not help us move in the right direction. Squeezing more students into overcrowded classrooms will not improve student learning.

California can do better for education. Please do not cut more from education; in fact, try to restore some of the money that has been cut in the last few years. Education is the answer to keeping our state and country strong.

Thank you for your consideration.
